

DRYOUT[®]

GOES IN WET, COMES OUT DRY[®]

HARD CASE PANEL

ENGINEERED WITH DRYOUT[®] MOISTURE-REMEDATION TECHNOLOGY

ELIMINATE MOISTURE INSIDE HARD CASES

Prevent irreversible moisture damage to your gear from water, condensation, rain, sweat, or humidity. The DRYOUT Hard Case Panel is designed for hard cases to protect electronics, firearms, optics, batteries, and other sensitive equipment from moisture damage. Engineered with patented moisture-removal remediation technology, DRYOUT actively wicks moisture -- keeping mission-critical gear dry, operational, and mission-ready.

- Protect and recover moisture-exposed gear faster.
- Prevents electrical damage, rust, and corrosion.
- Electricity-free, reusable, and field-proven.

PULLS

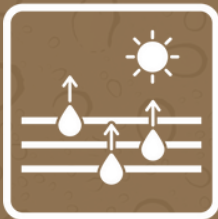

Actively pulls moisture from gear/equipment

TRAPS

Traps moisture to help prevent damage

RELEASES

Releases moisture with direct heat or airflow

DRYOUT®

HARD CASE PANEL SPECS

Customizable to any size, shape, and color. Part numbers are assigned by order.

WHY DRYOUT?

- Field operational -- no power source required.
- Designed for extended/repeated use.
- Quick stow, easy to place inside hard case.

DESIGNED FOR HARD CASES

- Custom sizes and shapes available for all case types.
- Attaches easily with durable Velcro for secure placement and removal.
- Works faster to wick moisture before damage occurs.
- Reusable without the need for power or electricity.

OUTPERFORMS TRADITIONAL DESICCANTS

DRYOUT absorbs more moisture than other “solutions” in the market today.

15.37x

Desiccant Tin Canister

3,464x

Silica Gel Packet

In a controlled test comparing a 6x12-inch DRYOUT panel to leading moisture-control solutions -- including a silica gel packet and silica gel tin canister, and a plug-in dehumidifier -- DRYOUT demonstrated significantly superior performance.
