

DRYOUT[®]

GOES IN WET, COMES OUT DRY[®]

HELMET BAG

ENGINEERED WITH DRYOUT[®] MOISTURE-REMEDICATION TECHNOLOGY

MOISTURE MANAGEMENT FOR MISSION-CRITICAL GEAR

DRYOUT advanced material protects and rescues sensitive equipment from moisture damage that can cause irreparable electrical failure, condensation, rust, or corrosion. By proactively wicking moisture off of and out of helmet-mounted gear, the DRYOUT helmet bag provides unparalleled protection to NVGs, headsets, lights, batteries, etc. that are mounted on the helmet.

PULLS

Actively pulls moisture from gear/equipment

TRAPS

Traps moisture to help prevent damage

RELEASES

Releases moisture with direct heat or airflow

HELMET BAG SPECS

Aviation Helmet Bag

WHY DRYOUT?

- Field operational -- no power source required.
- Designed for extended/repeated use.
- Quick stow, easy to store gear secured on helmet.

CUSTOMIZED TO PROTECT YOUR GEAR

DRYOUT helmet bags are designed to securely fit your helmet and mission-critical gear. Built to accommodate any mission-specific requirements, they can be fully customized in form factor, color, and add-ons -- ensuring a perfect match for your operational needs. No matter the mission, your gear stays protected from moisture damage and ready for action.

OUTPERFORMS TRADITIONAL DESICCANTS

DRYOUT absorbs more moisture than other "solutions" in the market today.

15.37x

Desiccant Tin Canister

3,464x

Silica Gel Packet

In a controlled test comparing a 6x12-inch DRYOUT panel to leading moisture-control solutions -- including a silica gel packet and silica gel tin canister, and a plug-in dehumidifier -- DRYOUT demonstrated significantly superior performance.
