ELIMINATE THE RISK OF

MOISTURE DAMAGE

TO MISSION-CRITICAL EQUIPMENT

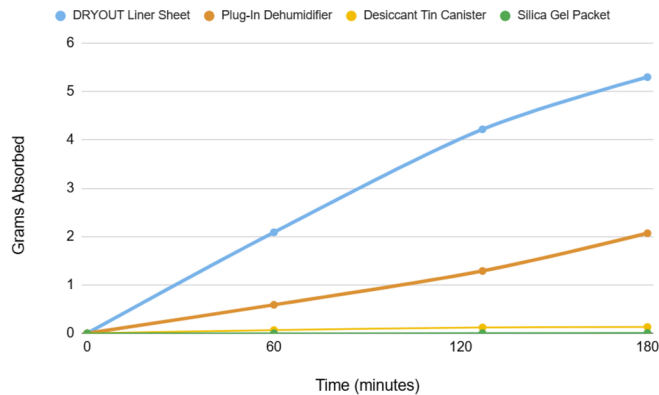

PROTECT AND RESCUE SENSITIVE EQUIPMENT

DRYOUT prevents rust, corrosion, and electrical damage.

OUTPERFORMS OTHER OPTIONS

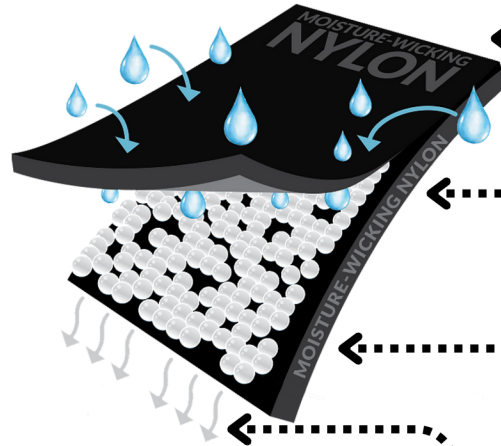

DRYOUT absorbs more moisture than other “solutions” in the market today.

2.5x	40x	791x
Plug-In Dehumidifier	Desiccant Tin Canister	Silica Gel Packet

Time is of the essence. **In 60 minutes, DRYOUT was 3.5x faster** than a plug-in dehumidifier.

PATENTED TECH

WATER AND MOISTURE PROTECTION

Equipment is protected from water-related damage or corrosion

MOISTURE REMOVAL

Moisture is drawn from equipment into moisture-wicking nylon

TRAP AND RELEASE

Super-absorbant material traps and holds moisture until it evaporates

DRY AND REUSE

Designed for repeated use and ongoing protection

CUSTOM SOLUTIONS

DRYOUT can be engineered to produce finished goods for storage, transport, and protection—such as bags, sleeves, pouches, clamshells, and hard case liners.

MOISTURE DAMAGE PREVENTION

DRYOUT advanced material protects the warfighter, first responders, and their sensitive equipment from rust, corrosion, and shorted circuits.

FIELD-READY

No batteries or external power sources required. DRYOUT is light-weight, reusable, and reliable.
